### Comments and Recommendations:

SDG&E's MBE procurement dropped from 29.84% in 2014. API and Latino procurement were also down in 2015, due to the end of a major construction project (East County Substation). However, SDG&E leads all reporting companies in Native American spending at 4.87%. SDG&E continues to excel in providing contract opportunities for small businesses, focused capacity building designed for small businesses, and increasing access to capital. SDG&E must continue its concerted efforts to balance out diverse procurement for one-time large capital infrastructure projects with diverse procurement in core areas of ongoing spending, which will provide more consistent opportunities for its supplier base.
